PROJECT #1 - CISC 4800 (Spring 2020)

Group Work: The first project is to be done individually.

Instructions for Submission:

Remote Submission:
Submit all of your code on GitHub. Create a repository with the class name and specify "first project". Submit the link to your repository to my email at
sumaiya.tabassum@brooklyn.cuny.edu by **Sunday March 1, 2020 11:59pm EST**.

Physical Copy Submission: The following parts are to be submitted in person in class on **Sunday March 1, 2020.** Make sure to staple all of the pages together and please put your name on the first page.

1. 1st page: Project proposal/problem statement
2. 2nd page: Outline
3. 3rd page: Diagram
4. 4th page: Screenshot of your website/webpage

Grading:

- Project #1 is **10% of your total grade**. The project itself will be graded out of 100 points. Below is the grade breakdown of the project:

1. Project Proposal/Problem Statement: 10%
    - I will not be assigning what the project theme will be. It is up to you to present clearly on a single page what your website/webpage is about and the inspiration behind it.
2. Outline: 20%
    - Please be clear in our outline. Yes, an outline will not say everything word by word about your website/webpage, however, it should be readable, understandable, and clear. Make sure there is a clear and logical flow in your outline.
3. Diagram: 20%
    - Translate your outline into a diagram (we did a few examples in class). Make sure there is a logical flow.
4. Code: 50%
    - Use all tags covered in class and additional tags not covered in class.

- Tags covered in class, excluding the necessary tags (e.g. html, head, body, title) were: p, a, h1, h2, h3, h4, h5, h6, div, ol, ul, li, br, table, img
- For tags: h1, h2, h3, h4, h5, h6, you do not have to use all of them unless you want to
- Use additional tags not covered in class
- Use inline, internal, and external css
- Use some JavaScript as well.

Project Suggestions: Below are a few suggestions for your first project. You can choose something else if you wish.

1. Blog Page
2. Landing Page
3. New Product Launch Page
4. Information Page
